

Opening a Business? Start Right.

A website, your POS, business email, and your Google listing — set up together, correctly, before you open your doors. One fixed price, nothing to piece together yourself.

BUILT WITH

Custom Website

Square

Clover

Google Workspace

Microsoft 365

QuickBooks Online

Google Business Profile

SOUND FAMILIAR?

No website yet, and no way for people to find you

Haven't picked a POS, or can't afford to get it wrong

Business email still forwarding to a personal Gmail

No Google Business Profile, so you're invisible in search

First month of Site Care free

WHAT YOU ACTUALLY GET

The Domain Is Always Yours

Registered in your name, on your own account. We manage the DNS while you're with us; you keep the keys either way.

No Assembly Required

One fixed price covers the website, POS, email, and your Google listing together, not a checklist of separate vendors.

Built to Grow With You

Ready for dashboards, automation, or deeper systems work later? It's the same team, not a handoff to someone new.

On-site installation is available from NYC to Philadelphia. Everything can also be done fully remotely, anywhere, with remote POS setup in place of on-site installation. Already have a website, or just need POS on its own? Ask about POS setup and installation starting at \$350.
